IDEALISM INTO ACTION:

Local Students Accepted to Prestigious Schweitzer Fellowship Program for 2009-2010 Take Aim at North Carolina's Pressing Health-Related Issues

Every year, more than 200 Albert Schweitzer Fellows across the U.S. follow in the footsteps of the Nobel Peace Prize-winning physician and humanitarian by developing and implementing direct service projects with a lasting impact on the health of underserved communities.

Since 1994, the North Carolina Schweitzer Fellows Program has supported the state's students in making just such an impact. This year, 26 new Fellows from health and human service disciplines at the area's top schools have been selected to join the North Carolina program's ranks, each partnering with a local agency and devoting more than 200 hours of service.

The 2009-10 North Carolina Fellows' projects directly and creatively address some of the area's most pressing health-related issues, including:

- Creating and implementing an adapted physical education program for children with autism (**Carrie Sacco, Fayetteville State School of Social Work**);
- Providing direct advocacy for children in high-conflict custody and domestic violence cases (**Thomas (Rich) McPherson, Wake School of Law**);
- Creating a mentoring program that pairs at-risk and overweight children ages 9-13 with medical students to encourage healthy lifestyles (**Negin Misaghian, ECU Brody School of Medicine**);
- Implementing an outreach program for postpartum mothers with babies in the neonatal intensive care unit (**Sadie Anderson and Wren McLaughlin, Duke School of Physical Therapy**);
- Addressing the psychosocial needs of family members of burn victims (**Brian Mikolasko and Melanie Robinson, Wake School of Medicine**);
- Providing face-to-face direct language and literacy enhancement to underserved preschool children, and providing outreach services to those children's parents (**Kelly York and Rachel Dent, NCCU School of Education – Speech Pathology**).

Descriptions of all of the 2009-2010 North Carolina Fellows' newly announced projects are available on www.schweitzerfellowship.org. For headshots of the Fellows, or to arrange interviews, please contact Patrice Taddonio at ptaddon@bidmc.harvard.edu or 617.667.5628.

ABOUT THE ALBERT SCHWEITZER FELLOWSHIP

Since its inception in 1991, the Schweitzer Fellowship has provided more than 400,000 hours of service to the communities it serves. Carrying on Schweitzer's legacy of translating idealism into action—and of restoring the moral compass of the health-related fields—Schweitzer Fellows are chosen through a competitive selection process from the nation's top health and human service schools. They serve for one year, working with local community agencies in Baltimore, Bay Area, Boston, Chicago, Greater Philadelphia, Houston/Galveston, Los Angeles, New Hampshire/Vermont, New Orleans, North Carolina, and Pittsburgh to implement sustainable projects that make a lasting, on-the-ground difference in the health of local communities.

Once Fellows have completed their year of service, they join a network of over 2,000 Schweitzer "Fellows for Life" across the United States and abroad. Virtually all continue their commitment to lives of service in cities and towns around the country and around the world. Because the work of the Fellows is donated without charge to the communities served, each city's program is supported entirely through charitable gifts. For more information or to receive a copy of our informational DVD featuring Dr. Timothy Johnson and Yo-Yo Ma, visit www.schweitzerfellowship.org or contact Patrice Taddonio at ptaddon@bidmc.harvard.edu or 617.667.5628.

ABOUT ALBERT SCHWEITZER

Albert Schweitzer was born on January 14, 1875 in a small village in Germany. As a young man, Schweitzer was a renowned philosopher, theologian, Bach scholar, organist, author, and pastor. At the age of 30, however, he decided to become a medical doctor, translating his idealism into action by dedicating his life to the direct service of people in Africa.

In 1913, Schweitzer and his wife founded the Schweitzer Hospital at Lambaréné, Gabon, then a province of French Equatorial Africa. It was there that he developed his credo of Reverence for Life, the idea that all life is as worthy of reverence as our own. In 1953, at the age of 78, Schweitzer was honored for his humanitarian work with the Nobel Peace Prize.

In September 1965, having powerfully advocated against nuclear proliferation, Schweitzer died at the age of 90 in Lambaréné. His legacy lives on through The Albert Schweitzer Fellowship.
